Work Experience

Pyek - November 2024 – Present | Pyek | Cowabunga Vegas | Typhoon Texas
Developer - Katy, TX

- Designed and expanded the Pyek corporate website from a single landing page to a comprehensive website with nearly 45 pages ensuring mobile responsiveness, accessibility, and maintainability
- Utilized UX design principles to plan, research, design, test, and analyze the effectiveness of a waterpark events calendar, resulting in a 54% increase in average engagement time per user
- Simplified, streamlined, and optimized email templates to ensure accessibility and optimal rendering across multiple email clients, resulting in a 32.9% increase in click rates and 8.6% increase in open rates over the first 90 days
- Tracked, analyzed, and A/B tested landing pages to maximize engagement, resulting in an average increase in conversion rates by 7%

Love Advertising - May 2023 - November 2024
Junior Web Developer - Houston, TX

- Coded multiple award winning interactive email campaigns for Phillips 66, and Typhoon Texas
- Developed, tested and deployed over 184 emails with extreme attention to detail using HTML and CSS with a 98.5% error free success rate
- Extensive experience building webpages using various CMS to achieve seamless integration and intuitive design for emails leading to a 3.4% average increase in open rate over time
- Wrote and communicated internal best practices onboarding documents for new hires and trained junior developers resulting in faster onboarding process
- Collaborated with cross functional team, utilizing multiple project management software such as Wrike and Asana to consistently complete projects ahead of schedule

Projects

The Mash Up – GitHub

- Built and collaborated with a team to build an e-commerce music website utilizing React, Vite, Apollo Server, and GraphQL where users could sign up, log in, and shop for music memorabilia
